

ASET PARTNERS
Systems Engineering and Technology

Year-Round Part-Time Paid Research Assistant Positions

ASET Partners is seeking bright, articulate, and self-motivated students and professionals to fill **Part-time, Year-round, Paid** Research Assistant positions. Applicants interested in emerging technologies, cyber security as well as numerous other non-technical disciplines such as accounting, writing, graphic design, and political science are encouraged to apply. This program is available to those interested in and capable of conducting research, performing detailed analysis, applying theory and research to real world problems, writing press releases, editing papers and proposals, doing graphical design and other research and management activities.

General Program Requirements and Information

- Applicants must be US Citizens.
- Applicants must provide their own computer and must have high speed internet access.
- The program is virtual and encourages the application of students from across the United States, however, ASET will not relocate individuals as part of this program.
- This is a part-time, **paid** position.
- Applicants are accepted, and positions are awarded, on a continual basis throughout the year.
- To qualify for a position, an applicant must reside in a SBA-designated HUBZone as defined on the SBA website at <http://map.sba.gov/hubzone/init.asp#address>

About ASET Partners

ASET Partners Corporation is a management consulting firm providing services and expertise in Federal IT strategy, systems engineering, software development, technology integration, advanced technology adoption, and Federal policy compliance and implementation to the Federal Government. ASET Partners' ***Technical Edge and Community-support by HubZone (TECH) Program*** is a **PAID** Year-round opportunity aimed at engaging those in historically underutilized business zones across the United States in the research, innovation and assessment of technologies for Government application.

TECH is designed to keep ASET at the cutting edge of technology while helping develop future technology and security professionals with a focused understanding of the technologies and challenges most critical to the Federal Government. This program leverages the applicant's education, familiarity and understanding of the latest cutting-edge technologies, security products, digital trends and research efforts to keep ASET Partners at the forefront of technology and in turn provide ASET Partners' clients with the best possible solutions. Outputs from the *TECH* program are used to maintain ASET Partners awareness of the technology horizon, drive ASET Partners strategy and approach and ensure the best services for ASET Partners clients.

This Research Assistant opportunity is open to those studying in any field at any location in the United States. Although preference is given to those in the technology or computer based-fields, the *TECH* program will consider applicants from non-technical fields including business, graphic design, English and Political Science, etc.

Interested and qualified applications should email their resume to Sally.Regan@cclowell.org
